

ICTS Group – Truck & Trailer Technician

Job description:

Are you passionate about trucks and technology? ICTS is expanding and looking for skilled mechanics to help shape the future of the Truck & Car Carriers operations in Antwerp. Work in a dynamic, international environment alongside a team of experienced professionals.

Your tasks:

- Perform preventive and corrective maintenance on truck & car carriers.
- Diagnose, estimate and repair mechanical and electrical damage.
- Carry out brake, engine, transmission, electronic, hydraulic & pneumatic repairs.
- Work and know-how regarding multi-brand trucks & car carriers.
- Prepare vehicles for inspection and road use.

Your profile:

- Education in automotive or electromechanics, or equivalent experience.
- Knowledge of mechanical systems (engine, transmission, suspension), electrical installations (CAN-bus, diagnostic tools, wiring), and electric equipment (tests, EBS/ABS, electronic locks, GPS).
- Ability to diagnose independently and implement solutions.
- Accurate, safe, and structured work style.
- Team player, but can also work independently.
- Used to work with multi-brand electronic fault detection systems.
- Experience with trucks and car carriers is an advantage.

Our offer:

- A challenging and varied position in an international organization.
- Work in the dynamic port area in Antwerp.
- Competitive salary with extra benefits.
- Ongoing training and opportunities for professional growth.
- A close-knit team where craftsmanship and collegiality come first.
